WICKING-PROPERTIES

QUICK DRY

Fabric using a specially engineered yarn creating a permanent wicking function. Absorbs moisture from the skin and transports it to the fabric's surface, where it evaporates to keep the wearer cool and comfortable.

A fabric's natural ability to retain its colour for a longer period of time over wearing and washing, typically found on a more robust material.

Garments feature an easily removable cut-out woven brand label, giving the garment a Henbury quality branded finish or allows the option of removing this for own re-branding.

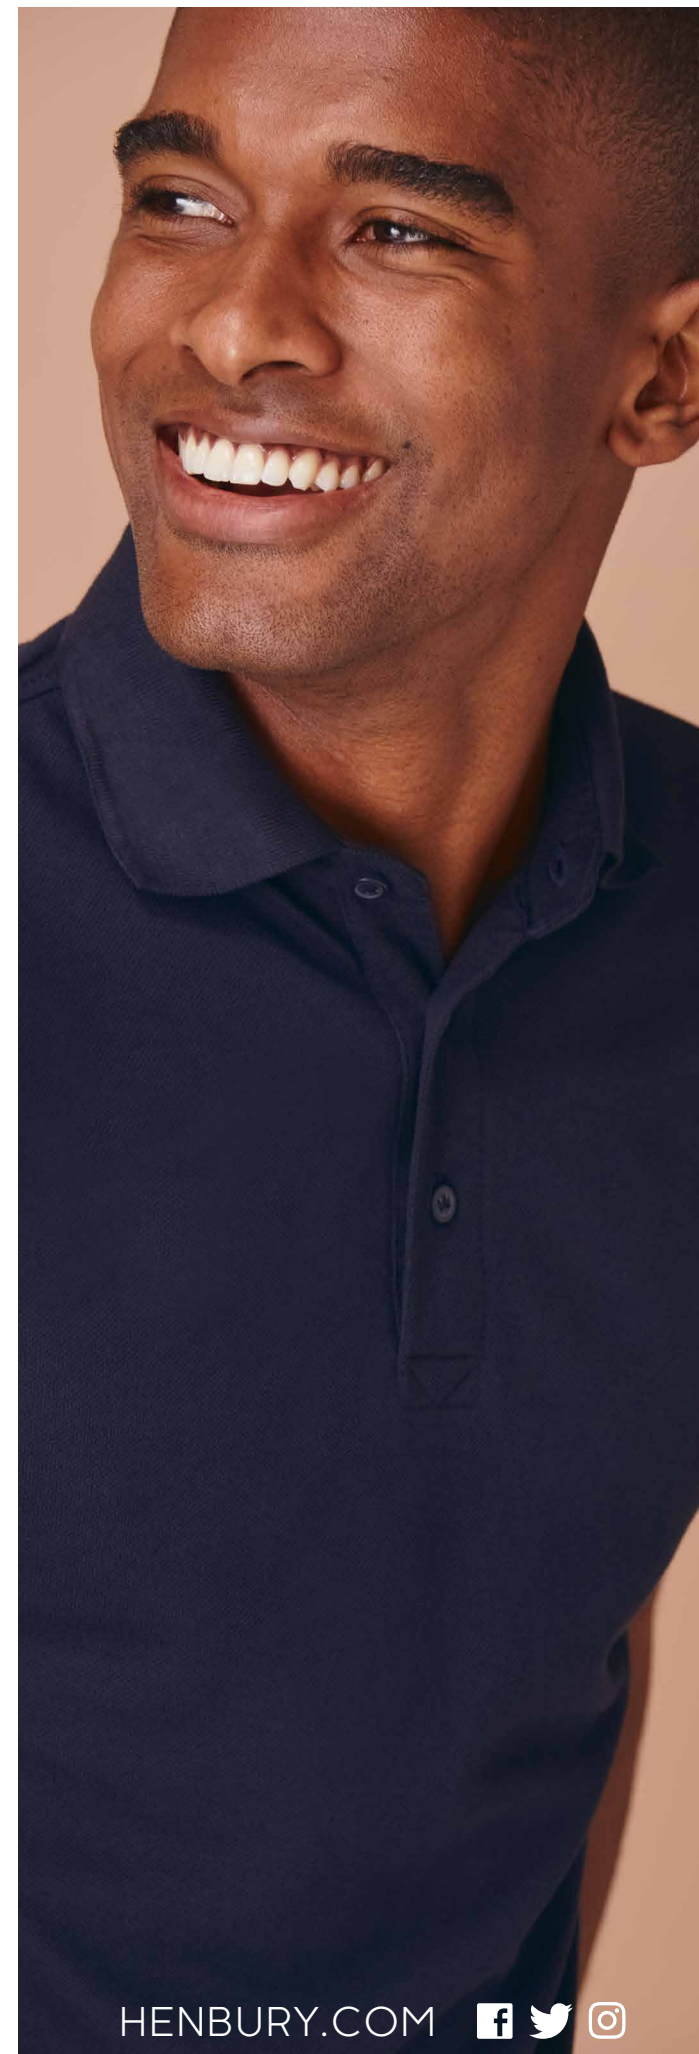

Fabric finish that makes garments easy to wash and dry.

A separate sewn on collar band provides extra strength at the neck to support the collar. Giving excellent shape retention and added comfort.

Absorbs moisture from the skin and transfers it to the fabric surface where it evaporates. Keeping the wearer cool and comfortable.

Fabrics that are naturally quick at drying due to the construction of their yarn.

Fabrics can be washed at 60 degrees without the concern of shrinking, ideal for workplaces where garments will be exposed to harsher use. Although, we do recommend to always wash at a lower temperature where possible to reduce carbon footprint.
